- Walking Shoes

How to Register:

Register online at houseofphotography.biz
Please call the studio at (936) 569-7116 for info or to register.

Learning to SEE

We will be learning all about what makes a photograph a GREAT photograph. You will learn some BASIC traits of Photographic Composition which helps YOU take great photos. This is one of the most exciting aspects of learning photography and kids are great at seeing with fresh eyes!

Practical Application & Critiques

We start each new day by reviewing the previous day's BEST images. Each day builds on previous days as kids are encouraged to use what they learned the previous day while applying those techniques to the new topics.

Having FUN in Learning

Each day after introducing a new topic or technique, we head out on a photo walk exploring beautiful Nacogdoches. Always a new location from the previous day, kids LOVE combining seeing something new and capturing that in photography. Its a FUN way to learn and the kids seem to be explorers at heart and eager to practice.

New for 2019 - July Camps v2.0

While there is overlap in ages, our v2.0 July camps are geared toward older kids. While they don't necessarily have to have any experience, we will be generally teaching at a higher level during these camps. If you're not sure which camp, give us a call and we can find out what might be a perfect fit. This is a perfect choice for anyone who has already taken one of our camps.

Friday - Grand Finalé/BIG SHOW

Our last day of camp, Friday is all about FUN but also the day we invite parents to view the BIG SHOW. We start the day with a Photo Safari and end showing off your kids BEST photos of the week. We encourage parents grandparents to set aside this day to celebrate all they learned during kids photography camp.

From the early age of 13, photography has been a passion of mine. I've had the privilege of living my dream, working as a professional photographer for over 30 years starting as the university photographer for Stephen F. Austin and then opening a portrait studio. After earning a Master's degree, I began my next photography related journey of teaching and have taught over 1000 students photography in

the Mass Communication department. Now retired from teaching, I am looking forward to passing my passion on to our community through workshops, photo walks and talks. I look forward to teaching your kids a little about photography while having fun. It should be a great week. ~Greg Patterson
